Traktor Story

In an area that served as an intersection for communication and roads ever since, besides the Baredine cave as a natural monument, you can also visit an ethno story devoted to agriculture.

It shows various items, machines and numerous photographs and documents closely linked to the history of this area and its people. The story starts with a threshing floor, next to which there is an exhibition on wheat threshing and the invention and development of threshing machines. The exhibition continues with a permanent exhibition of about fifty historic tractors and various types of engines called „Traktor story“. Particularly prominent is an old Fordson tractor from 1923, the first tractor in our village, as well as an old engine with a heated head, which was used to run a mill in Poreč at the beginning of the last century.

Konobon Gallery

In the exclusive area of the Konobon Gallery you can learn more about the story of the Mediterranean trilogy – bread, wine and olive oil, all present in this area from the period of Antiquity, the medieval period until the present moment.

Degustations are offered only along with a visit of the Traktor-Story & Konobon-Gallery and require an additional payment for the entrance ticket to the Traktor-Story & Konobon-Gallery according to the aforementioned price list for group visits.
